:hager

# Innovative Electrical Solutions

As an independent family-owned and run company Hager Group is one of the industry's leading innovators for commercial and residential applications. With 11,400 employees globally, our components and solutions are produced in 25 different locations to support our customers projects in more than 136 countries around the world.

In the UK we have a well-established research and development team combined with global resource to meet the needs of the market. This is backed up by the UK factory having ISO 9001:2015 and an on-site ASTA recognised laboratory to BS EN ISO/IEC 17025:2005, which ensures that products and solutions meet all of the relevant British standards. The UK site also has OHSAS 18001:2007, ISO 14001:2015 and the Investors in People Bronze Award.

Working out solutions in close consultation with customers we have the vision 'to add value to peoples' lives and their buildings through smart, eco-efficient and energy saving solutions and services'.

# Type A & B Distribution Boards

Our Invicta 3 Type B Boards have been developed as the solution for commercial installations. The whole nature of electrical sub and final distribution for commercial installations has changed in recent years, with demands for more outgoing ways, more RCD protection, more metering and more control devices.

## In The Range

SP&N / TP&N

Invicta 3 125A / 250A

IP65

Incomer Kits

Meter Packs

Dual / Tri Metered Boards

Hybrid

Extension / Cable Spreader Boxes

# Panelboards

Invicta 3 Panelboards are incredibly easy to install, the pan assembly, door and front cover can all be removed to make the product lighter when fixing to the wall. Keyhole slots and a central fifth keyhole fixing point make fitting and levelling the board even simpler.

## In The Range

Invicta 3 250A / 400A / 630A / 800A

Incomer Kits

Meter Packs

Meter Enclosures

Extension / Cable Spreader Boxes

Panel & DIN Rail Meters

CTs & Meter Cables

# Metering & Monitoring

UK wiring regulations and local building regulations create additional requirements for electrical distribution boards in commercial building applications. A range of incoming device options and scalable energy metering options ensure specific application requirements are met. Easy to specify and install, our metered distribution board options create scalable solutions for typical commercial building applications.

## In The Range

Side / Top / bottom / Corner Meter Enclosures

Panel Meters

DIN Rail Mounted Meters

CT to Plug-in Converter

Plug-in CTs

Meter Cables

# Protection Devices

For integration into Electrical distribution systems in commercial building applications, our electrical distribution boards are available with a range of protective device incomer options. SD, MCCB and RCCB incomers are available. In addition, 4P changeover units are available for 125A Type B boards. Outgoing devices for MCB boards also include a wide range of RCBO devices covering 10mA, 30mA and 100mA applications in B and C curve.

## In The Range

MCBs

RCBOs

RCCBs

Motor Starters

Fuse Carriers

Surge Protection

Earth Fault Relays

MCCBs

# A thoughtful approach to Surge Protection

We have developed a brand new range of dedicated SPD kits, specifically for our Commercial Distribution boards.

Our kits have been created to provide optimum end equipment protection against surge transient voltages after an increased focus on this requirement in the 18<sup>th</sup> edition wiring regulations.

## Space saving integration.

Where required, board designs have been changed to enable all kits to fit within the actual distribution board, rather than in a separate enclosure next to the distribution board. This also allows for the shortest possible connection to the SPD from the incoming supply, providing optimum performance.

Our SPD kits have the additional benefit of not requiring any additional upstream protection devices, saving more space in the board for protection devices.

## Integrated testing

The wiring regulations advise that SPD's should be selected from one manufacturer to ensure that they work well together. Our Type 1 Panelboard SPDs have been tested to ensure coordination with Type 2 SPDs in TP&N boards.

We've developed our boards and SPD kits together and tested the effective performance of how well high voltage transients are managed down to levels that don't harm electrical equipment

**Through development testing, we have removed the need to consider many of the application & installation variables that previously made SPD selection and installation complicated.**

## A solid connection

Through extensive testing we know that removing secondary protective devices, using short conductor paths to SPD's and replacing cables with solid copper Earth links dramatically improves the effectiveness of the SPD.

Without these features our testing has shown that common installation variables can easily lead to a very significant reduction in the effective performance of the SPD, potentially leaving surge voltages at a level that can damage end equipment

# Type B TP&N Distribution Boards

Invicta 3 Type B boards have been designed for safe and simple installation, with features to benefit both installer and end user.

Take a look below to see all of the features we have designed in and how this is going to make installing a distribution board so much easier.

## 01 Aesthetics

Strong board aesthetics ideal for commercial offices, health care and education projects where boards may be sited in public areas.

## 02 Metering

A number of metering options provide a scalable solution to energy monitoring. Type B Distribution boards are also available with dual channel meters for separate monitoring of Power and lighting loads. A metered three section Type B board is also available to monitor power and lighting and mechanical services.

## 03 Trunking Entry

Unique trunking entry obround system top and bottom enables quick fitting to trunking and without the extra cost in time and materials. The edge is curved, ready to bring cables in without the worry of sharp edges.

## 04 Hybrid TP&N Board Available

Our Invicta TP&N Hybrid Distribution Board is available to provide two 3 phase loads of up to 125A or six single phase loads. The larger 80-125A MCB devices, whilst providing short circuit and overload protection, also give a disconnection point for downstream circuits (isolation). This ensures that there are no unprotected outgoing connections from the busbar system.

## 05 Shrouded Neutral Bar

Clear shrouded neutral bar to IP2X allows the contractor to install cables without removing the shroud. Ensures safe and easy installation.

# Invicta Panelboards

Our Invicta 3 Panelboards have been designed to make installation a breeze, take a look below for a brief overview of all of the features.

01

## The Perfect Match

Our Invicta 3 panelboards have been designed to match perfectly with the Invicta 3 Type B distribution boards. The Invicta 3 Panelboard range is the most aesthetically pleasing available on the market, with its glazed door and curved edges.

## 02 Twin Earth & Neutral Bars

Allows easy identification of earth & neutral conductors with corresponding line conductors.

## 03 Removable Pan Assembly

To lighten the product when fixing to the wall, pan assemblies can also be purchased as a separate part or removed for fitting into cubicle switchboards.

## 04 Energy Metering

The installer only has to fit the packs into the board. All internal wiring is included. RJ45 connectors simplify the connection of CTs to meters.

## 05 Removable Gland Plates

The top and bottom removable gland plates allows cable entries to be prepared away from the board, preventing ingress of swarf etc.

# Metered Power & Lighting Board

Monitoring Power and light loads separately, creates a better understanding of where electricity is being consumed. Our power and lighting boards employ dual channel meters and are supplied with the main incoming device pre-installed. Available as standard in a variety of configurations and sizes to suit most applications up to 24TP ways. A Tri-metered TPN board is also available as standard, where separate monitoring of Power, Lighting and Mechanical services loads is required.

## 01 Energy Saving

Installing and monitoring meters leads to savings of 5-10% of the energy being metered. For example, a meter that identifies pumps being left on for 24hrs, seven days a week, may save 60% of energy passing through if the pump is only used when required.

## 02 Building Regulations

The Building Regulations 2010 & approved document L2 recognise the valuable role of metering and include requirements of sub-metering in buildings other than dwellings.

## 03 Choice

There are many options to monitor energy consumption. Direct metering, measurement and estimation should all be considered.

**04**  
**Communication**

**05**  
**Control & Performance**

Metering helps building occupiers to understand how energy is being used and lets them see the patterns of where and when energy is consumed. Useful trends can be shown from the data produced.

Metering provides feedback to designers, manufacturers, government and the supply side industry on performance achieved, helping them to improve global energy performance by setting better targets.

# Arc Fault Detection

## What the regs say BS 7671 18<sup>th</sup> Edition

Regulation 421.1.7 recommending installation of AFDD in AC final circuits.

- Premises with sleeping accommodation
- Buildings with risk of fire due to processed or stored materials e.g. Wood working shops
- Buildings constructed of combustible materials e.g. Barns
- Locations with irreplaceable objects e.g. Museums

### Parallel Arc Fault

### Series Arc Fault

## Potential Causes

Arc faults can be caused by all types of line faults and worn contacts. An AFDD will trip the circuit when a potentially hazardous arc occurs, eliminating the resulting fire hazard.

Kink/break in the cable

Cable wear due to frequent use

Line damage resulting from drilling or construction work

Incorrect wire stripping

Incorrect bending radii

Loose screwed connections

Defective plugs

Rodent bites

For commercial applications, our AFDD can be wired in series with MCB's / RCBO's to create a flexible approach to AFDD integration.

Using any of our TPN Distribution board, standard din extension enclosures provide simple and scalable accommodation for AFDD requirements.

Note: our AFDD is an MCB + AFDD, so when used in series with another OCP device, it is likely that both devices will trip under an overcurrent event.

## Greater breaking capacity 10 kA

Higher prospective fault currents require devices with higher breaking capacities.

So in addition to the 6kA range of AFDD for residential applications, we now offer devices with a 10kA breaking capacity, making them more suitable for typical commercial building installations.

This microprocessor based technology has been evolved to ensure algorithms profiling typical UK final circuit loads, provide safe reliable operation.

## Monitoring via Microprocessor

An AFDD is activated by both series and parallel arc faults. Unlike circuit breakers or RCDs, an AFDD does not have an electromechanical trigger, but utilises electronic technology to analyse the signature (waveform) of an arc. It reliably differentiates between an arc fault and the signature (waveform) in normal switching and control events, preventing false tripping.

## Effective areas of protective devices depending on fault position & type

Fault Between	Short Circuit	Overload	Residual current	Serial Arc	Parallel Arc
L-L					
L-N	MCB/ RCBO	MCB/ RCBO	RCD/RCBO	AFDD	
L-PE					RCD/RCBO/AFDD

**Auxiliary contact, alarm contact and shunt trip devices are available as supplements:**

- MZ201, auxiliary contact 1C + 1O
- MZ202, alarm contact 1C + 1O
- MZ203, shunt trip 230–415 V AC

AFDD with extension accessories from the MCB and RCCB/MCB range

# Commercial Distribution

Powering a building to its potential, it's what we do. We have the perfect solutions to help an office, factory or industrial site save energy and keep their occupants safe. From Panelboards to our range of enhanced TP&N boards with metering capabilities, our commercial offering will create the perfect electrical ecosystem for a building.

### SP&N Distribution Boards

#### Characteristics:

- SP&N distribution boards are available from 4-28 outgoing ways. The range comes with a choice of either 100A 2 pole switch disconnector, 63A 30mA 2 pole RCCB Type A or 100A 30mA 2 pole RCCB Type A, or a range of split load versions.
- Conforms to BS EN 61439-3.  $I_{nA} = 63A/100A$ ,  $I_{nc} = 63A$ ,  $I_{cc} = 10kA$
- Cable Sizes: 100A: 50mm<sup>2</sup>, 63A: 16mm<sup>2</sup>
- Ample wiring space, with provision to accept RCBO's.
- Full complement of earth and neutral terminal bars to accept up to 16mm<sup>2</sup> cable.
- Suitable for cable entry on all sides and back.
- For dimensions see page 64.

The relevant part of the BS EN 61439 series applies to the integration of mechanical and electrical components (switching devices, control devices, busbars, functional units, etc.), into an enclosure. Hager systems such as consumer unit, distribution board and panel board ranges are certified to the appropriate part of the BS EN 61439 series. When selecting other device / enclosure arrangements, please contact Hager technical support for guidance - 01952 675689.

### DIN Rail Enclosures

#### Characteristics:

- One, two or three row 8-66 module enclosures, fitted with DIN rails to accept any combination of Hager devices. Ample wiring space, with provision to accept RCBO's.
- Conforms to BS EN 62208.  $I_{nA} = 63A/100A$ ,  $I_{nc} = 63A$ ,  $I_{cc} = 10kA$
- Full complement of earth and neutral terminal bars to accept up to 16mm<sup>2</sup> cable.
- Suitable for cable entry on all sides and back.
- For dimensions see page 64.

### Invicta 3 SP&N Distribution Boards

#### Characteristics:

- Boards are available with 14 & 29 outgoing ways. The range comes with a 100A 2 pole switch disconnector to accept 50mm<sup>2</sup> cable. Ample wiring space, with provision to accept RCBO's.
- Conforms to BS EN 61439-3.  $I_{nA} = 63A/100A$ ,  $I_{nc} = 63A$ ,  $I_{cc} = 10kA$
- Full complement of earth and neutral terminal bars to accept up to 16mm<sup>2</sup> cable.
- Suitable for cable entry on all sides and back.
- Enclosures are available with plain or glazed doors.
- For dimensions see page 64.

# Type B TP&N Distribution Boards

## Invicta 3 125A, Metered Boards, IP65 Distribution Boards

JK106BG

<sup>1</sup> A **JK101SE** may be required to provide additional incoming cable space, see page 65.

<sup>2</sup> Full metal cover & door to comply with BS 7671 Amendment 3, where required for domestic dwelling applications.

### Invicta 3 125A TP&N Distribution Boards (125A Incoming, 63A Outgoing)

#### Characteristics:

- Surface mounted steel enclosures, IP3XD rated available with plain, glazed & Amendment 3 door options.
- Conforms to BS EN 61439-3,  $I_{nA} = 125A$ ,  $I_{nC} = 63A$ ,  $I_{CC} = 25kA$
- Supplied without incoming & outgoing devices. A Hager incomer kit must be used.
- Incoming cable sizes: 125A & 100A 50mm<sup>2</sup>, 63A 16mm<sup>2</sup>
- Option with factory fitted SPD Type 2 & 4 Pole SD incomer.
- For dimensions see page 65.

### 125A Dual Metered Boards - MID Meter

#### Characteristics:

- Boards are supplied with a dual channel meter that offers a pulsed & modbus output.
- Conforms to BS EN 61439-3,  $I_{nA} = 125A$ ,  $I_{nC} = 63A$ ,  $I_{CC} = 25kA$ .
- Provided with MID dual channel meter and 125A TP switch disconnector pre-fitted. Each individual pan is fully rated at 125A.
- For dimensions see page 68.

### IP65 Distribution Boards (Steel version not suitable for outdoor use)

#### Characteristics:

- Suitable for three phase applications where a high IP rating is required.
- Conforms to BS EN 61439-3,  $I_{nA} = 125A$ ,  $I_{nC} = 63A$ ,  $I_{CC} = 25kA$ .
- Available with either a steel (mild steel, powder coated) or Glass Reinforced Plastic (GRP) enclosure.
- Supplied without incoming and outgoing devices. A Hager incomer kit must be used.
- Available up to 125A direct connection with outgoing distribution, rated for MCBs from 0.5A to 63A.

### Side by Side Incomer Kits for 125A Boards

#### Characteristics:

- Complete with 125A 3P SD incomer
- Cable sets to connect to distribution boards (left)
- Suitable for all 125A TP&N board sizes

Description	Cat ref.
Dual kWh Meter Pack 125A Incomer Pulsed & Modbus	M8 Lug <b>JKD125MID</b> *
Triple kWh Meter Pack 125A Incomer Pulsed & Modbus	M8 Lug <b>JKD125TMID</b> *

### Surge Protection Kits for 125A Boards

#### Characteristics:

- SPD kit for direct integration within 125A TPN boards
- Low U<sub>p</sub> value assured through use of solid busbar connectors and solid copper Earth
- SPD suitable for TN / TT Earth arrangements including TNC-S (PME)
- CT2 type SPD to accommodate multiple Earthing systems.
- Coordination verified with upstream Hager Panelboard SPDs.

# Type B TP&N Distribution Boards

Invicta 3 250A TP&N Boards, Tri-Metered Board, Hybrid Boards

JK208BG

<sup>1</sup> Full metal cover & door to comply with BS 7671 Amendment 3.

## Invicta 3 250A TP&N Distribution Boards (250A Incoming, 63A Outgoing)

### Characteristics:

- Surface mounted steel enclosures, IP3XD rated, available with plain, glazed & Amendment 3 door options.
- Conforms to BS EN 61439-3.  $I_{nA} = 250A$ ,  $I_{nC} = 63A$ ,  $I_{CC} = 25kA$ .
- Supplied without incoming and outgoing devices. A Hager incoming kit must be used.
- For dimensions see page 65.

JKD2884PM

## 200A Tri Metered Boards (Power, Lighting & Mechanical Services)

### Characteristics:

- Provides separate energy information for each group of outgoing devices.
- Boards are supplied with meters that offer a pulsed & modbus output.
- Provided with a 200A switch disconnector incomer pre-fitted with ample cable space.
- Conforms to BS EN 61439-3.  $I_{nA} = 200A$ ,  $I_{nC} = 63A$ ,  $I_{CC} = 25kA$ .
- For dimensions see page 68.

JK20210BG

## Hybrid 250A TP&N Distribution Boards (250A Incoming, up to 125A outgoing)

### Characteristics:

- A hybrid distribution board combining 2x TP ways of 27mm MCB devices to supply end loads up to 125A, with standard 18mm MCB/RCBOs for other smaller loads.
- Surface mounted steel enclosure, IP3XD rated, available with plain steel or glazed door options.
- Conforms to BS EN 61439-3.  $I_{nA} + 250A$ ,  $I_{nC} = 63A / 125A$ ,  $I_{CC} = 25kA$
- For dimensions see page 66.

### Invicta 3 Panelboards (250A Incoming 125A Outgoing)

#### Characteristics

- Comprises of IP3XD rated enclosure, pan assembly, twin neutral and earth bars.
- Conforms to BS EN 61439-2.  $I_{nA} = 250A$ ,  $I_{nc} = 125A$ ,  $I_{cc} = 25kA$ .
- Supplied without incoming kit, JN 250A incomer kit must be used.
- Form 3B type 2 using outgoing terminal shield (form 3A without terminal shield).
- Removable side gland plates are standard. Removable gland plates are provided top and bottom for ease of installation.
- For dimensions see page 73.

#### Cable Capacity Incomers & Outgoers

- Incomers: 3 and 4 pole incomers, cable capacity 150mm<sup>2</sup>, max lug width 25mm, M8 bolt, direct connection kit.
- Outgoers: 1 & 3 pole MCCB 70mm<sup>2</sup> flexible, 95mm<sup>2</sup> solid.

#### Options

- Key lock, meter pack, DIN rail, extension box, spreader box.

#### Outgoing MCCBs

- Adjustable thermal options on triple pole devices.

### 250A JN Panelboard Surge Protection Device Kit

#### Characteristics

- SPD kit for direct integration within 250A Panelboards
- Fail safe design SPD facilitates direct connection to main busbars
- SPD suitable for TN / TT Earth arrangements including TNC-S (PME)
- CT2 type SPD to accommodate multiple Earthing systems
- Solid copper Earth link for enhanced  $U_p$  performance
- Supplied with mounting & connection set

Description	Cat ref. Plain door
SPD kit Type 1+2 for JN Panelboards	<b>JN201SPD *</b>
SPD kit Type 2 for JN Panelboards	<b>JN202SPD *</b>

JN201SPD (Device only)

### DIN Rail Extension Boxes

#### Characteristics

- Supplied with DIN Rail & without gland plate (utilise removed gland plate from panelboard)
- DIN rail extensions boxes have plain or glazed doors and DIN rail chassis.
- JK2 side extension boxes can be used with this range see page 25.
- For dimensions see page 67.

JN201BE

Description	Cat ref. Plain Door	Cat ref. Glazed Door

### Invicta 3 Panelboards (400A Incoming 125A Outgoing)

#### Characteristics

- Comprises of IP3XD enclosure, pan assembly, neutral bar and earth bar.
- Conforms to BS EN 61439-2.  $I_{nA} = 400A$ ,  $I_{nC} = 125A$ ,  $I_{CC} = 50kA$ .
- Supplied without incoming kit, one of the incomer kits listed below must be used.
- Form 3B type 2 using outgoing terminal shield (form 3A without terminal shield).
- Removable gland plates are provided top and bottom for ease of installation.
- For dimensions see page 74.

#### Cable Capacity Incomers & Outgoers

- Incomers: 3 and 4 pole incomers, cable capacity: M12 bolt, direct connection kit: M10 hexagonal bolt.
- Outgoers: 1 & 3 pole MCCB: 70mm<sup>2</sup> flexible/ 95mm<sup>2</sup> solid.

#### Options

- Key lock, meter pack, DIN rail, extension box, spreader box.

#### Outgoing MCCBs

- Adjustable thermal options on triple pole.

### Invicta 3 Panelboards (630A/800A Incoming 125A Outgoing)

#### Characteristics

- Comprises of IP3XD enclosure, pan assembly, neutral bar and earth bar.
- Conforms to BS EN 61439-2.  $I_{nA} = 630/800A$ ,  $I_{nc} = 125A$ ,  $I_{cc} = 50kA$ .
- Supplied without incoming kit, one of the incomer kits listed below must be used.
- Form 3B type 2 using outgoing terminal shield (form 3A without terminal shield).
- Removable gland plates are provided top and bottom for ease of installation.
- Switch Disconnector: 630A/800A, MCCB: 400A/630A, Direct connection: 800A.
- Incoming cable lugged via M12 hexagonal bolt.
- For dimensions see page 74.

#### Cable Capacity Incomers & Outgoers

- Incomers: 400A: 2 x 240mm<sup>2</sup>, 630A: 2 x 240mm<sup>2</sup> / 2 x 300mm<sup>2</sup>.
- Outgoers: Single pole up to 125A - 70mm<sup>2</sup> flexible, 95mm<sup>2</sup> solid, Triple pole up to 250A - 150mm<sup>2</sup> flexible.

#### Outgoing MCCBs

- Adjustable thermal options on triple pole.

### Meter Enclosures for JF Panelboards

- Blanking plates not included (utilise removed blanking plate from panelboard).
- When selecting outgoing metering, the panelboard metering system is easily configured by selecting a side, top or combination that matches the panelboard (e.g. for the **JF406B/G** board, you can select a **JF12504SM** side mounted meter enclosure that can house 4 **ECM01** panel mounted meters). When using both side and top/bottom meter enclosures, corner filler enclosures are available.
- For help choosing your metering solution see the Method Chart on page 75.
- Please contact us for any non-standard requirements or assembly.
- For dimensions see page 77.

**Single Phase Direct Connect kWh Meters - MID Approved****Description:**

- MID approved meter range (except EC...180T)
- A range of both direct connect and CT supplied din rail mounted meters

**Characteristics:**

- CT supplied meters compatible with 1 A / 5A CT's (not suitable for use with cables / ct's from page 38)
- Choice of communication options – pulse output kWh, Modbus or Mbus

630A = 2 x 300mm<sup>2</sup>  
800A = 2 x 300mm<sup>2</sup>

### Fuse Combination Switches 20 - 800A

#### Characteristics

- Provides individual protection and control of circuits.
- Enclosures up to 100A have been designed to provide adequate cabling space without the need for additional cable spreader boxes.
- Operation of the device is through a door mounted rotary handle which is mechanically interlocked to prevent access to live conductors when the switch is in the on position. The handle is padlockable in the off position.
- All versions will accept standard BS 88 fuse links and can be converted to switch disconnector by fitting copper links.

#### Utilisation category

- AC22B - 630 - 800A
- AC23A - 20 - 630A

#### Product features

- Conforms to: BS EN 60947-3
- Rated IP31.

**Note:** Maximum rated fuse links are fitted in all fuse combination switches.

**Note:** Copper links for conversion to isolating switches

- For dimensions see page 84.
- For technical information see page 86.

# Switch Disconnectors

IP65 Switch Disconnectors, Auxiliary Changeover Contacts

JG01S

**Cable Capacity**  
20 - 40A = 16mm<sup>2</sup>  
63 - 100A = 35mm<sup>2</sup>

## IP65 Switch Disconnectors

- A range of enclosed switch disconnectors to IP65 for individual isolation.
- The devices are padlockable in three positions and offer plenty of cabling space. Clip on auxiliary contacts can be fitted retrospectively.

### Product features

- Conforms to: BS EN 60947-3.
- IP65 to BS EN 60529.

**Range:** TPN 10, 16, 25, 40, 63 & 80A.

### Utilisation category

- AC- 21.
- AC- 22.

- For technical information see page 87.

### Cable Capacity

## IP65 Switch Disconnectors - DC

- Used in applications such as photovoltaic installations where they isolate the incoming side of the inverter.
- They are supplied in grey with a black handle so that it is easy to distinguish them from the yellow/red a.c. switches used on the outgoing side of the inverter.

### Product Features

- Conforms to: BS EN 60947-3 IP65 to BS EN 60529.
- An interlock ensures that the cover cannot be removed in both the ON and PADLOCKED OFF positions.

## Enclosed ATS

### Characteristics

- A range of enclosed Automatic Transfer Switches in IP30 rated enclosure. Available in ratings 40A – 125A.
- Conforming to BS EN 60947-3 & IEC 60947-6-1
- Overvoltage Category II
- Pollution degree 3
- Electromagnetic compatibility – Environment category – A
- Rated voltage of assembly: U<sub>n</sub> = 415V a.c. 50Hz
- Rated operational voltage of assembly: U<sub>e</sub> = 415V a.c. 50Hz
- Rated insulation voltage of assembly: U<sub>i</sub> = 690V a.c. 50Hz (Power Circuits) / 300V (Control Circuits)
- Rated impulse voltage of assembly: U<sub>imp</sub> = 6kV (Power Circuits) / 2.5kV (Control Circuits)
- Rated current of assembly: I<sub>na</sub> / I<sub>nc</sub> = 125A max
- Rated peak withstand current: I<sub>pk</sub> = 105kA conditional (table 7, n = 2.1)
- Rated short-time withstand current: I<sub>sw</sub> = 7kA / 0.3 secs  
: I<sub>sw</sub> = 4kA / 1.0 sec
- For dimensions see page 76.

**Enclosed MCCBs**

- The devices are mounted in IP31 enclosures, with removable cable entry plates located on the top and bottom.
- Single & triple pole devices are equipped with fully rated neutral links.

**Non-Auto MCCB**

- Triple pole: 125A - 250A - 400A - 630A.
- Four pole: 125A - 250A - 400A - 630A.

**Specification**

- Conforms to BS EN 61439-2.

**Cable Capacity**

- 63 - 125A: Flexible cable: min 6mm<sup>2</sup>, max 70mm<sup>2</sup>. Rigid cable: min 6mm<sup>2</sup>, max 95mm<sup>2</sup>.
- RCD add-on adjustable from 0.03A, 0.1A, 0.3A, 1A, 3A, 6A.
- Time delay - Instantaneous, 60ms, 150ms, 300ms, 500ms, 1s.
- For technical details and dimensions see page 90.

NCN116A

**MCBs 10kA****Characteristics**

- Provides protection against short circuits, protection against overload current, control, isolation, trip free mechanism.

**Isolation**

- The state of isolation is clearly indicated by the "OFF" mechanical position on the toggle with the green colour.
- Connection capacity: 25mm<sup>2</sup> flexible conductor, 35mm<sup>2</sup> rigid conductor.
- Conforms to: BS EN 60898-2 (10kA), BS EN 60947-2 (15kA).

### RCBOs - Single Pole - 10kA B & C Curve Type A

#### Characteristics

- Compact protection devices which combine the overcurrent functions of an MCB with the earth fault functions of an RCCB in a single unit.
- These devices are single pole & solid neutral.
- Locking kit = Cat ref.: **MZN175**.

#### Technical Data

- Conforms to IEC 61009-1, IEC 61009-2-2, EN 61009-1.

#### Sensitivities (fixed)

- 10mA, 30mA & 100mA.
- Flying neutral lead: 700mm.
- Terminal Capacities, 25mm<sup>2</sup> rigid, 16mm<sup>2</sup> flexible.

#### Operating Voltage

- 230V a.c.

**Arc Fault Detection Devices****Characteristics:**

- Protection device which combines an MCB with Arc Fault Detection.
- Conforms to BS EN 62606
- Current rating 6A - 40A 10kA
- Available in B & C curve
- Terminal Capacities, 25mm<sup>2</sup> rigid, 16mm<sup>2</sup> flexible.

### RCBOs - Single Pole & Switched Neutral - 4.5kA C Curve

#### Characteristics

- Compact protection devices which provide MCB overcurrent protection and RCCB earth fault protection in a single unit.
- The device switches both the line and neutral conductors. All ratings have 30mA earth fault protection. The units feature indicators which show whether a trip is due to an overcurrent or earth fault.

#### Technical Data

- Breaking capacity: 4.5kA.
- Conforms to EN 61009-1.
- Operating Voltage: 230V a.c. -15% +10% 50Hz.
- Mechanical life: 20,000 operations.
- Connection Capacity: Rigid conductor 25mm<sup>2</sup>, Flexible conductor 16mm<sup>2</sup>
- **Note:** Not for use in fixed busbar consumer units or distribution boards.

### Triple Pole RCD Add-On Blocks for MCB Devices

#### Characteristics

- Compatible with **NBN**, **NCN** & **NDN** range of MCB devices.
- Can be used in combination with any Hager 3 pole 10kA MCB up to 63A. Requires the use of the adjacent outgoing way.
- Type A RCD provides added protection against 'pulsating d.c. current'
- 3 Phase earth leakage protection up to 63A.
- One module add-on block + MCB combinations suit all Hager distribution boards.
- BS EN 61009-1 Appendix G.
- For technical details see page 101.

### RCCB Add-On Blocks for MCB Devices

#### Characteristics

- Provide earth fault protection when associated with the 10kA (types **NBN**, **NCN**, **NDN**) range of MCBs.
- Designed to be fitted to the right hand side of 2 and 4 pole MCBs and the completed unit provides protection against overload, short circuit & earth faults.
- Protection against nuisance tripping.
- All devices have a test facility.
- Note: Not for use in fixed busbar distribution boards.

#### Technical Data

- Nominal voltage 230 - 400V.
- Selective (time delay) versions are available in 100mA & 300mA.
- Connection Capacity: 16mm<sup>2</sup> Flexible, 25mm<sup>2</sup> Rigid.
- Conforms to BS EN 61009 Appendix G

HMF199T

**MCBs 80 - 125A**

- Suitable for isolation (according to BS EN 60947-2). The isolation of the circuit breakers is indicated by a green indicator on the toggle.

**Standards**

- 10 kA: BS EN 60898-1, 10 kA BS EN 60947-2
- 15 kA: BS EN 60898-1, 15 kA BS EN 60947-2
- $I_{n}$  80 to 125A

**Connection Capacity**

- 35mm<sup>2</sup> flexible (50mm<sup>2</sup> possible with some cable pin lugs).
- 70mm<sup>2</sup> rigid.

**Nominal Voltage**

- 230/415 V a.c.
- Calibration setting: 30 °C
- (BS EN 60898-1)
- Insulation voltage: 500 V

**Lockable Toggle**

- MCB can be locked in "Off" position by the integrated locking facility on the toggle.
- This lock allows the insertion of a 2.5-3.5mm plastic cable tie where you can fit a warning card if necessary, allowing a safer working environment.
- Compatible with RCD Add-On Blocks.

- The setting is done by actuating dial on the front face. The setting dials are protected by a transparent sealable cover.

**Disassembly**

- The bistable latch (two positions) facilitate the assembly or disassembly by the bottom of the add-on block.
- These RCD add-on blocks exist in version AC.
- The earth fault is indicated when the handle is in the lower position (yellow colour). Test button for earth fault check.

**Connection Capacity**

- 35mm<sup>2</sup> flexible connection
- 70mm<sup>2</sup> rigid connection.

**Nominal voltage**

- 2 pole 230V, three & four pole: 230 / 400V
- Test button: 230 / 400V.
- Conforms with BS EN 61009-1 appendix G.
- Conforms with BS EN 60947-2.

## 2 & 4 Pole RCCBs

### Characteristics

- To open a circuit automatically in the event an earth fault between line and earth, and/or neutral and earth.

### Technical Data

- Conforms to BS EN 61008, IEC1008
- Terminal capacities: 16-63A Rigid 25mm<sup>2</sup>, Flexible 16mm<sup>2</sup> / 80 & 100A Rigid 50mm<sup>2</sup>, Flexible 35mm<sup>2</sup>

### Features

- Positive contact indication is provided by the rectangular flag indicator
- Red = Closed
- Green = Open
- Indication of trip is provided by the oval flag indicator
- Yellow = Tripped
- All RCCBs have trip free mechanisms and can be padlocked either on or off with the use of a **MZN175**.

### Operating Voltage

- 2P 127- 230V a.c.
- 4P 230 - 400V a.c.

### HRC Fuse Carriers (supplied without cartridge fuse)

#### Characteristics

- Protection and control of circuits against overloads and short-circuits.
- Suitable for fuses which comply with BS HD 60269-1 and with the standardised performance requirements for industrial fuse links specified in BS HD 60269-2 (formerly BS 88-2).

#### Technical Data

- Rating voltage: 415 V a.c., 250 V d.c.
- Rated breaking capacities: 80 kA at 415 V a.c., 40 kA at 250 V d.c.
- The LS201 HRC fuse carrier is suitable for the following type of BS 88-2 cartridge fuses:
  - 2A – 8A: with nickel-plated or silver plated caps.
  - 10A – 32A: with silver plated caps only.

### Surge Protection

#### Characteristics

- SPD's protect electrical and electronic equipment against transients, originating from lightning, switching of transformers, lighting and motors. These transient voltages can cause premature ageing of equipment, downtime, or complete destruction of electronic components and materials. SPDs are strongly recommended on installations that are exposed to transient voltages, to protect sensitive and expensive electrical equipment such as TV, video, Hi-Fi, PC, alarm etc.
- The range of SPDs is separated into three types of protection:
  1. Main protection - class 1  
SPDs with higher discharge current ( $I_{max}$  10/350), to evacuate as much of the transient over-voltages associated with lightning strikes
  2. Main protection - class 2  
With a discharge current ( $I_{max}$  8/20), to evacuate as much of the transient over-voltage to earth as possible protection level ( $Up \leq 1200V$ ).
  3. Main protection - class 3  
To cut-down the transient surge as low as possible to protect very sensitive equipment.

#### Technical Data

- Conforms to IEC61643-1.
- R Versions: reserve status indicator, signalling.
- D Versions: end of life indicator, auxiliary contact for remote indication.
- Connection Capacity (terminal blocks L, N & E): Rigid conductor: 10mm<sup>2</sup>, Flexible conductor: 6mm<sup>2</sup>.
- 230V a.c. 1A.
- 12V...10mA.

OK

#### Installation and Connection

- The main protection SPDs are installed directly after the main incoming switch or RCCB
- SPDs are suitable for any supply system e.g TNCS, TNS, TT.
- Connected in parallel to the equipment to be protected.
- Protection is assured in both common and differential modes.

#### SPDs with Low Let Through Voltage Levels Type 3

- To protect very sensitive electronic equipment. This fine protection complements the main protection and can protect one or many electronic devices.
- Optimal coordination is obtained when cascaded with a main protection device.
- A green LED on the front face indicates the status of the **SP202N**, connected in series with the equipment that needs to be protected (with a maximum line current of 25A). Protection is assured in both common and differential modes.

#### Replacement Cartridges

- Allow simple replacement without the need to cut-off the power supply.
- Cartridges are available for all discharge currents (40kA and 15kA) with and without condition indication.
- A keying system exists to prevent a line cartridge being interchanged by mistake with a neutral one and visa versa. Neutral cartridges have a discharge current of 65kA.
- For technical details see page 104

### Surge Protection Kits

#### Characteristics

- Developed to ensure effective protection of end equipment from fast transient overvoltages, where supplied from Hager Commercial distribution boards.
- Solid copper Earth links on all SPD kits and other design principles ensure optimum protection of end equipment through validated low  $Up$  effective SPD performance.
- For more information on these Surge Protection Kits see distribution board pages.

### Earth Fault Relays

#### Characteristics

- Provides monitoring of earth fault currents. When the fault current rises above the selected level, the output contacts of the product operate.
- Depending on the relay selected, it can have either fixed or adjustable sensitivity. A time delay is also available for selectivity purposes. The relays are linked with detection torroids, available in circular and rectangular variants.
- Positive safety: the relay trips in the event of a break in the relay/torroid link.
- Positive reset required after a fault is detected.
- Test button for simulation of a fault.
- Protected against nuisance tripping from transients.
- Conforms to BS EN 61008.

#### Technical Data

- Type A RCD protection.
- Output: 1 C/O contact, 250V a.c. 5/6A AC1.
- Visual display of fault by red LED.

#### Specific device features of HR525 & HR534.

- Display of fault current before it triggers the relay (5% to 75%).
- Extra output contact (250V 0.1A max.) to enable remote indication if fault currents over 50% of  $I_{\Delta n}$ .
- Remote test and reset (opto-coupled).

#### Connection capacity

- Relay - 1.5 to 6mm<sup>2</sup>
- Relay - torroid link: 2 wires, 25m max.
- Test and remote reset link: 3 wires, 20m max.
- For enclosure selection, please consult us.

### Moulded Case Circuit Breakers x160 18kA

#### Characteristics

- Thermal magnetic trip unit, two versions: Z version: fixed thermal and fixed magnetic.
- Access to mechanical test button on cover.
- Lockable cover protects MCCB settings.
- Integrated padlocking handle: Ø 4mm.
- Connection capacity: 95mm<sup>2</sup> rigid cables, 70mm<sup>2</sup> flexible cables.
- Cage terminals
- Conforms to BS EN 60947-2.
- Fixed thermal: 1x I<sub>H</sub>
- Adjustable thermal: 0.63 - 0.8 - 1 x I<sub>H</sub>
- For technical details see table on page 111.

## Accessories for x160 Devices

### Indication contacts

- 1 changeover switch (ON/OFF): indicates the position of the MCCB "open" or "close".
- 1 changeover alarm contact: indicates MCCB tripped.

### Coil connection

- Connection capacity: 0.75 mm<sup>2</sup> flexible or rigid cables
- The cable capacity of the terminals is 0.5 to 1.25mm<sup>2</sup>.

### Shunt trip

- Remote tripping of MCCBs
- Operating voltage: 0.7 to 1.1 x U<sub>n</sub>

### Under voltage release

- Enables tripping of MCCBs or moulded case switches when voltage level drop between 35 and 70% of U<sub>n</sub>. Pick up voltage 0.85 x U<sub>n</sub>.
- Padlockable direct rotary handle is equipped with front cover and handle, fixing without additional screws.

## Add-On Blocks for x160 Devices

### Characteristics

- These devices are intended to be fixed on the right side of the devices.
- Type A RCD protection for protection against pulsating d.c.
- High Immunity reduces unexpected tripping (generated by micro-processing, electronic ballast etc.).
- Fixed version: 300 mA sensitivity and instantaneous tripping, adjustable version: adjustable sensitivity and time delay.
- Test button for electrical functioning check.
- LED fault indication and auxiliary output for remote indication - (25-50% I<sub>Δn</sub>).
- Assembly and disassembly facilitated by the drawer assembly system.
- Connection capacity: 95 mm<sup>2</sup> rigid cables, 70 mm<sup>2</sup> flexible cables.
- Sensitivity I<sub>Δn</sub>, adjustable: 0.03 - 0.1 - 0.3 - 1 - 3 - 6A
- Adjustable tripping: instantaneous or time delay: 0.06 - 0.15 - 0.3, 0.5 - 1 s
- Conforms to BS EN 60947-2.

### Moulded Case Circuit Breakers x250 25kA

#### Characteristics

- Thermal magnetic trip unit, two versions: Z version: fixed thermal and fixed magnetic. H version: adjustable thermal magnetic.
- Access to mechanical test button on cover.
- Lockable cover protects MCCB settings.
- Integrated padlocking handle: Ø 4mm.
- Connection capacity: 150mm<sup>2</sup> rigid cables, palm lug max. width: 25mm
- Conforms to BS EN 60947-2
- AC 22/23A.
- For technical data see page 121.

#### x250 25kA

- Fixed thermal: 1x  $I_{th}$
- Fixed magnetic: > 10 x  $I_{th}$

#### x250 40kA

- Adjustable thermal: 0.63, 0.8, 1 x  $I_{th}$
- Adjustable magnetic: 6 - 8 - 10 - 13 x  $I_{th}$  (100 - 200A). 5 - 7 - 9 - 11 x  $I_{th}$  (250A).

JKD1164PM	1400	465	165.5
JKD1812PM	1400	465	165.5
JKD1128PM	1400	465	165.5
JKD11212PM	1400	465	165.5

### Triple Power, Lighting & Services Board

	Dimensions (mm)		
	Height	Width	Depth
JKD2884PM	1850	465	165.5

### Meter Characteristics

Supply	60 to 300V AC, 50/60Hz ( $\pm 5\%$ )
--------	--------------------------------------

### Serial Communication

Interface Standard and Protocol	RS485 and MODBUS RTU
---------------------------------	----------------------

### Input (CT)

Pluggable RJ45	Input 1 / Input 2
----------------	-------------------

### Output

Pulse Output:	Voltage Range : 24V DC max
Current Capacity :	100mA max
Pulse Duration :	Selectable Between 0.1 to 2.0sec
Pulse Weight :	Selectable between 0.01 to 9.99kWh

### Accuracy of meter

Measurement	Accuracy
Voltage VL-N	0.5% of full range
Voltage VL-L	0.5% of full range
Current A	0.5% of full range
Frequency	
For L-N Voltage > 20V	0.1% of full range
For L-L Voltage > 35V"	
Active power	1.0% of full range
Apparent Power	1.0% of full range
Reactive Power	1.0% of full range
Power Factor	$\pm 0.01\%$ of full Range
Active Energy	1.0% of full range
Reactive Energy	1.0% of full range
Max/Min Active Power	1.0% of full range
Max/Min Reactive Power	1.0% of full range
Max Apparent Power	1.0% of full range
Power Consumption	Less than 8VA

Characteristics	JK1**	JK2**
Standards	Designed, manufactured and tested to BS EN 61439-3	Designed, manufactured and tested to BS EN 61439-3

**Invicta 3 Panelboard Metering Method Chart**

Use the process below to aid you in selecting the appropriate Invicta 3 Panelboard, side extension boxes, meters, meter supply cables and CT's.

Step	Selection method	Catalogue page	Order code	Qty
1	Select panelboard eg. 6 way with glazed door <b>(JN206BG)</b>	250A Page 28. 400A Page 30. 630A/800A Page 32. 800A Page 34.	<b>JN206BG</b>	1
2	Identify quantity of meters required eg. 4 metered ways modbus ( <b>ECM01</b> )	Page 39.	<b>ECM01</b>	4
3	Select position for meter enclosure (Top or side) eg. Top - 450mm enclosure 6xDIN 96 Cut- Outs or Side - 6/8 Way JN Board 4xDIN 96 Cut-Outs	For JN Page 28. For JF Page 39.	<b>JN4506TM</b> <b>JN11004SM</b>	1 1
4	Number of blanking plates required eg. Top - 450mm enclosure 6xDIN 96 Cut- Outs or Side - 6/8 Way JN Board 4xDIN 96 Cut-Outs	Page 39.	<b>JF96BP</b>	2 0
5	Meter voltage supply including fuses. (1st meter only includes incoming) e.g. <b>JN130VMF</b>	Page 38.	<b>JN130VMF</b>	1
6	Supply cable for remaining meters (Link meter to meter) e.g. <b>PGMFT150</b>	Page 38.	<b>PGMFT150</b>	3
7	Identify which CT's are required eg. 60 Amp Qty 1 eg. 100 Amp Qty 2 eg. 125A Qty 1	Page 38.	<b>EC1260CT</b> <b>EC12100CT</b> <b>EC12125CT</b>	1 2 1

# Multi-Function Meter - ECM01

## Single CT Connection, DIN 96

:hager

- 96 x 96mm Flush mounting
- Single phase or 3 phase (4 wire) network balanced or unbalanced load
- Built in energy pulsed output or with pulsed output and RS485 (modbus)
- Backlit LCD display with bargraph current indication on every page
- Automatic or manual scrolling display
- 330mV current transformer input
- Active energy class 1 (EN62053-21)
- Reactive energy class 2 (EN62053-23)
- Programmable VT ratio

- 3-phase: 140...460Vac measured voltage
- Single phase: 80...265Vac measured voltage
- THD up to 31<sup>st</sup> harmonic for voltage and current
- Self supplied auxiliary
- Programmable CT ratio 5 to 10,000A
- Frequency 45/65Hz
- Wide range of measured parameters (see table below)
- Selectable CT phase correction allows reversal of L1 and L3
- Weight 230g

### Function Diagram

### Dimensions Diagram (mm)

Please allow space at the rear of the meter for cable connections.

- 4 Module DIN rail mounting
- Single phase or 3 phase (4 wire) network balanced or unbalanced load
- Built-in energy pulse output and RS485 MODBUS communication
- Wide range of measured parameters (see table below)
- High quality backlit LCD display
- 330mV current transformer input
- Active energy class 1 (EN62053-21)
- Reactive energy class 2 (EN62053-23)
- THD up to 31st harmonic for voltage and current

- 3-phase: 140...460Vac measured voltage
- Single phase: 80...265Vac measured voltage
- Self supplied auxiliary
- Programmable CT ratio 5...10,000A
- Programmable VT ratio
- Frequency 45/65Hz
- Selectable CT phase correction allows reversal of L1 and L3
- Weight 190g

# Multifunction Meter - JKM02

## Dual CT Connection, Panel Mounting

:hager

- Split Load, Dual CT input meter
- 4 Module DIN rail mounting
- Single phase or 3 phase (4 wire) network balanced or unbalanced load
- Built-in dual energy pulse output, one for each load and RS485 MODBUS communication
- Wide range of measured parameters (see table below)

- High quality backlit LCD display
- 330mV current transformer input
- Active energy class 1 (EN62053-21)
- Reactive energy class 2 (EN62053-23)
- THD up to 31st harmonic for voltage and current
- 3-phase: 140...460Vac measured voltage
- Single phase: 80...265Vac measured voltage

- Self supplied auxiliary
- Programmable CT ratio 5...10,000A per load
- Programmable VT ratio
- Frequency 45/65Hz
- Selectable CT phase correction allows reversal of L1 and L3
- Weight 200g

### Function Diagram

### Dimension Diagrams (mm)

Please allow space above and below the meter for cable connections.

- Connect up to three standard or split core CT's (1A or 5A secondaries)
- Integrated protection circuitry

**Standard CT to plug-in Adaptor**

The JFA03 converter allows for the connection of up to three standard current transformers, or standard split-core current transformers (with 1A or 5A secondary's), to the plug-in system.

The unit has integrated protection circuitry allowing for disconnection from meter under load conditions for maintenance.

**Important Note**

This converter does not provide electrical isolation.

Current transformer secondaries may not be earthed and should be wired as shown.

**Technical Specification**

Burden:	<2VA per channel (5A Version) <0.5VA per channel (1A Version)
Accuracy:	0.4%
Suggested Cable Size: (CT to Adaptor)	1.5mm <sup>2</sup> or 2.5mm <sup>2</sup> (2.5mm <sup>2</sup> Max.)
Mounting:	DIN rail 35mm
Termination:	CT to adaptor - Rising clamp screw terminals Adaptor to Meter - RJ45 Patch Cable
Operating Temperature: Storage Temperature:	-10°C...+45°C -25°C...+70°C

**Dimension Diagrams (mm)**

# Three Phase Measuring CTs

## Technical Data

:hager

### Description

Designed for use with Hager x160 MCCBs and the plug-in multifunction power meters.

Internal safety circuitry is provided which limits the output voltage to a safe level, allowing the transformer secondary to be left disconnected under load.

### Installation

The CT uses plug-in technology allowing much faster installation, saving you time and money. Additionally, all our three phase current transformers have been designed with hole centres and apertures to fit most standard industrial circuit breakers.

**CT Output and RJ45 Lead Tester**

This device makes it possible to test the RJ45 patch lead used to connect the current transformer to the meter. It also enables a standard electricians multimeter to measure the individual secondary outputs of the current transformer. To test the RJ45 patch lead, simply disconnect the lead from the meter and current transformer. Plug one end into socket 1 and the other end into socket 2 on the test box. Press the test button - the Green LED will light to indicate the lead is OK or the Red LED will light to indicate a faulty lead. When the lead is proven to be OK you can then check the individual secondary outputs of the current transformer. To measure the secondary output plug one end of the RJ45 patch lead into the current transformer and the other end into socket 2 on the test box. You can now use a standard multimeter to test the secondaries using the test points on the front of the test box. The output measured for each phase should be between 0 and 330mV a.c.

Model Reference: **JFT03**

**3 Phase CT Splitter Box**

This 3 Phase CT Splitter Box allows the separate monitoring of each phase of a three phase current transformer on individual energy meters. Model Reference: **JFS03**

**Meter Voltage Supply Cable**

Our high quality Meter Voltage Supply Cables are fitted with a plug at one end and insulated bootlace ferrules at the other and provide power to the plug-in meter from your mains supply.

**Meter to Meter Supply Cable**

Our high quality Meter to Meter Voltage Supply Cables are fitted with a plug at one end and socket at the other. This allows multiple plug-in meters to be energised from a common supply. Up to 32 meters can be powered in a 'daisy chain' arrangement using this method.

Two type of cable material are available:- LSZH (Low Smoke Zero Halogen).

**RJ45 Connection Cable**

The high quality low loss Category 5e RJ45 Connection Cable provides secondary connection between the plug-in current transformer and meter.

### Fuse - Combination Units - BS EN 60947-3

Many people are attracted to fuse-combination units by their simplicity in application and their reliability in operation. They are particularly useful for use on very high prospective fault level systems where the high energy limiting characteristic of the HRC fuse can be effectively utilised. In the past fuse-combination units came in two forms:

Switch Fuse  A switch in which one or more poles have a fuse in series.

Fuse Switch  A switch in which one or more poles have a fuse carrier/link which forms the moving contact.

The definitions of these two basic types of fuse combination units have now been extended to include units suitable for making, breaking and isolation and units which are only suitable for providing isolation for maintenance work.

Definition	Symbol	Function
Switch Fuse		Making and breaking current
Disconnector Fuse		Isolating
Switch Disconnector Fuse		Making, breaking and isolating
Fuse Switch		Making and breaking current
Fuse Disconnector		Isolating
Fuse Switch Disconnector		Making, breaking and isolating

However, in order to keep the selection of fuse-combination units as simple as possible, Hager offer a range of high performance double break switch-fuses, which also satisfy the isolating requirement of the British standard. These are correctly shown as and defined as a Fuse Combination Switch.

Switch disconnectors - BS EN 60947-3. A range of switch disconnectors (isolators) are available for use on lower current ratings from 20A to 125A. These switches are rated at AC-22 and provide a cost effective alternative to the fuse combination switch, especially where the utilisation category AC-23 is not required. ie; mixed resistive and inductive loads.

### Utilisation categories

Utilisation categories are not new but they are important because they help the designer or specifier identify the correct unit for a particular application.

The designation of the utilisation category is made up of three parts:

1. The prefix AC or DC, which indicates the nature of the current.
2. The two digit number, which indicates the type of application the unit is suitable for:
  - 20 Connecting and disconnecting under no-load.
  - 21 Switching of resistive loads.
  - 22 Switching of mixed resistive and inductive loads.
  - 23 Switching of highly inductive loads.
3. The suffix A or B, which indicates whether the unit is suitable for frequent or infrequent operation.
  - A Frequent operation
  - B Infrequent operation.

For example a fuse-combination unit feeding a 400V AC circuit of mixed resistive and inductive loads which would need to be operated frequently would require a minimum utilisation category of AC-22A.

If the load was highly inductive, i.e. motor loads, then the minimum utilisation category would be AC-23A.

Generally, category AC-23 does not cover the switching of capacitors. Usually this is the subject of agreement between manufacturer and user.

### Motor Power Circuit Protection

Fuse-combination units can be used very effectively for motor power circuit protection, the energy limiting HRC fuse offering very good protection to its associated starter. Category AC-23A should be specified for this duty. Special motor circuit protection fuse links are available which eliminate the need to fit a larger bodied fuse just to take care of the starting current of the motor.

The protection of motor power circuits should not be confused with the direct switching of a single motor. If a fuse-combination unit is required to perform this function then it must comply with the requirements of Appendix A of BS EN 60947-3 which makes provision for different utilisation categories for this application.

The IP rating for all low voltage enclosures up to 1000 V a.c. and 1500 V d.c. is defined in identical fashion by the standards EN 60529 - IEC 529. It comprises the letters IP followed by two character numerals and or additional/supplementary letters.

**The first character numeral** indicates the degree of protection provided by the enclosure against access to hazardous parts by preventing or limiting the ingress of a part of the human body or an object held by a person and ingress of solid foreign objects.

**The first character numeral:**  
Protection against foreign objects

IP	Description
0	Non-protected
1	 Protected against solid objects ≥ than 50mm
2	 Protected against solid objects ≥ than 12.5mm
3	 Protected against solid objects ≥ than 2.5mm
4	 Protected against solid objects ≥ than 1.0mm
5	 Dust-protected
6	 Dust-tight

**Additional letter (optional)**  
Protection of people against access to hazardous parts

	Description
A	Protected against access to hazardous parts with the back of the hand
B	Protected against access to hazardous parts with a finger
C	Protected against access to hazardous parts with a tool - ø 2.5mm
D	Protected against access to hazardous parts with a tool - ø 1mm

**The second character numeral** indicates the degree of protection provided by the enclosure with respect to harmful effects on the equipment due to the ingress of water. An X signifies that the tests are not applicable to the product.

**The second character numeral:**  
Protection against ingress of water with harmful effects

IP	Description
0	Non-protected
1	 Protected against dripping water
2	 Protected against dripping water when tilted up to 15°
3	 Protected against spraying water
4	 Protected against splashing water
5	 Protected against jetting
6	 Protected against powerful jetting
7	 Protected against the effect of temporary immersion <small>15 cm</small>
8	 Protected against continuous immersion <small>1 m</small>

**Additional letter (optional)**

\*Din rail mount only, not for use in fixed busbar distribution boards.

### Power Loss

The power loss of MCB's is closely controlled by the standards and is calculated on the basis of the voltage drop across the main terminals measured at rated current. The power loss of our circuit breakers is very much lower than that required by the British Standard, so in consequences run cooler and are less affected when mounted together.

The table below gives the watts loss per pole at rated current.

<b>MCB Rated current (A)</b>	0.5	1	2	3	4	6	10	13	16	20	25	32	40	50	63
<b>Watts loss per pole</b>	1.2	1.3	1.5	2.0	1.8	1.4	1.9	2.1	2.5	2.8	3.2	3.8	4.0	4.5	5.1

### For use with DC

Because of their quick make and break design and excellent arc quenching capabilities, our circuit breakers are suitable for DC applications.

The following parameters must be considered:

1. System voltage:

Determined by the number of poles connected in series (see **Table 14**).

2. Short circuit current:

(See **Table 14**).

3. Tripping Characteristics:

If the thermal trip remains unchanged the magnetic trip will become less sensitive requiring derating by  $\sqrt{2}$  the ac value (See **Table 14**).

<b>No. of poles</b>	<b>1 pole</b>		<b>2 poles in series</b>	
	<b>Range</b>	max voltage	breaking capacity L/R=15ms	Max voltage
<b>MTN</b>	60V	6kA	125V	6kA

<b>Irm2</b>	5In	7.5 In	10In	15 In	20 In 30 In

**Table 14**

**Connection**

The circuit breaker can have the line\load connected to either the top or bottom terminals

**Temperature Derating**

MCBs are designed and calibrated to carry their rated current and to operate within their designated thermal time/current zone at 30°C. Testing is carried out with the breaker mounted singly in a vertical plane in a controlled environment. Therefore if the circuit breaker is required to operate in conditions which differ from the reference conditions, certain factors have to be applied to the standard data.

**Diversity Factor - Commercial Distribution boards to BS EN 61439-3**

Consideration should be given to the proximity heating effect of the breakers when fully loaded and mounted together in groups.

Adjacent circuit breakers having a load 'on' time exceeding 30 minutes or where the load not exceeding 30 minutes has an 'off' time less than the 'on' time, will need to have the rated diversity factor applied.

No. of Outgoing Circuits	Assumed Loading Factor
2 and 3	0.8
4 and 5	0.7
6 to 9 inclusive	0.6
10 and above	0.5

**Frequency**

Circuit breakers are designed to operate at a frequency of 50-60Hz. Should the supply differ from this then the following factors should be applied

Thermal – unchanged

Magnetic – value multiplied by coefficient K

F (Hz)	17Hz - 60Hz	100Hz	200Hz	400Hz
K	1	1.1	1.2	1.5

Consideration should be given to the proximity heating effect of the breakers when fully loaded and mounted together in groups. (continuously & simultaneously loaded).

### Functions

Tripping and indication auxiliary contacts are common to the range of multi-pole 10kA MCBs, and RCCBs. They should be mounted on the left hand side of the device.

### Auxiliary Contact MZ201 (Fig 9)

Allows remote indication of the status of the device contacts to which it is associated.

### Auxiliary Contact and Alarm Contact MZ202

This accessory has two separate functions. Like the **MZ201** auxiliary contact, however the alarm contact will provide indication if the breaker trips under fault conditions.

### Wiring Diagram

#### MZ201 Auxiliary Contact and Alarm Contact

Fig. 9

### Electrical Characteristics

MZ201/MZ206	MZ203	MZ206
1 x O 1 x C Contact 230V ~ 6A AC-1		
230 - 415~ 110 - 130...	230V~ 50Hz	

### Grouping / Combination of Several Auxiliaries

On 2, 3 and 4 pole MCBs it is possible to associate 3 auxiliaries – 2 indication auxiliaries and 1 release auxiliary. In this case, it is important to first fix the indication auxiliary (**MZ201** and **MZ202**) and then the release auxiliary (**MZ203** and **MZ206**).

Fig. 11

### MZ203 Shunt Trip\*

Allows tripping of the device by feeding the coil. The contacts also allow for remote indication of operation.

### MZ206 Under Voltage Release\* (Fig 10)

Allows the MCB to trip when the voltage drops or by pressing a remote off switch (i.e. emergency stop).

\* Indication that the product has tripped due to the voltage release is provided by a flag on the product.

### MZ206 Under Voltage Release

Fig. 10

### Electrical connection

By terminal fitted with fixed clamp screws wiring capacity.

Flexible : 2 x 1.5mm<sup>2</sup>

Rigid : 2 x 1.5mm<sup>2</sup>

### MZ203

Power - 8VA

tolerance : -15% of U<sub>n</sub>

### MZ206

Latching voltage is between 35 and 70% of U<sub>n</sub> 230V~

Coil consumption 3VA

### Earth Fault Loop impedance ( $Z_s$ ) values for MCBs and MCCBs

### Residual Current Devices

A residual current device (RCD) is the generic term for a device which simultaneously performs the functions of detection of the residual current, comparison of this value with the rated residual operating value and opening the protected circuit when the residual current exceeds this value. These devices can take several different forms i.e. Residual Current Circuit Breaker (RCCB), Residual Current Circuit Breaker with integral Overload protection (RCBO), or a residual current device incorporated within a socket outlet or other accessory (SRCD)

Residual current circuit breakers (RCCB) protect against earth faults only and not short circuits. They are usually therefore used in conjunction with overcurrent protective devices.

### MCB/RCCB Co-ordination

Short circuit capacity of the RCCB

## Transformer Protection

Tables 19 & 20 show the recommended MCB's for the protection of single phase (230V) and three phase (400V) transformers.

Single Phase 230V

		Recommended MCB		
Transformer Rating (VA)	Primary Current	NBN	NCN	NDN
50	0.22	-	1	6
100	0.43	-	2	6
200	0.87	-	3	6
250	1.09	6	4	6
300	1.30	10	4	6
400	1.74	10	6	6
500	2.17	16	10	6
750	3.26	16	10	6
1000	4.35	25	16	10
2500	10.87	63	40	20
5000	21.74	-	63	32
7500	32.60	-	-	50
10000	43.48	-	-	63

Three Phase 400V

		Recommended MCB		
Transformer Rating (VA)	Primary Current	NBN	NCN	NDN
500	0.72	-	3	6
750	1.08	6	4	6
1000	1.44	10	6	6
2000	2.88	16	10	6
3000	4.33	25	16	10
4000	5.77	32	20	10
5000	7.21	40	25	16
7500	10.82	63	32	20
10000	14.43	-	50	25
15000	21.64	-	63	32
20000	28.86	-	-	50
25000	36.07	-	-	63

## Motor Circuit Protection

Tables 28,29,30 and 31 give general recommendations for the selection of circuit breakers and HRC fuses for the protection of motor power circuits and are based on the assumptions shown in Table 28 for a cage motor running at approximately 1400 Rev/Min.

Motor Rating	DOL Starting Conditions	Assisted Start Conditions
Up to 0.75kW	5 x FLC for 6 secs	2.5 x FLC for 15 secs
1.1 to 7.5kW	6 x FLC for 10 secs	2.5 x FLC for 15 secs
11 to 75kW	7 x FLC for 10 secs	2.5 x FLC for 15 secs
90 to 160kW	6 x FLC for 15 secs	2.5 x FLC for 20 secs

1 Phase 230V DOL Starting

### Main Characteristics

#### "Reset" Button

When pressed, the output remains switched and return to normal is obtained by either: by pressing the "reset" clear pushbutton or cutting off the power supply. If the "reset" button is not pressed the device remains in the fault position.

#### Test Button

Pressing the test button allows a fault simulation which operates the relay and the output contacts. The fault level display is shown by an LED on the front of the product.

#### $I_{\Delta n}$ Selector

Sensitivity setting: 0.03A instantaneous  
0.1A/0.3A/1A and 3A time delay

#### Time Delay Selector

Adjustable time setting - instantaneous / 0.13s / 0.3s / 1s and 3s

#### Sealable Settings

A sealable cover prevents interference once the settings have been made.

#### Standard Output (1 C/O contact)

Switching to state 1 on:

- Failure of the core/relay connection
- Fault current in the monitored installation

#### Positive Safety Outlet (1 C/O contact)

Switching to state 1: Switching on the power

Switching to state 0: Failure of the core/relay connection

fault current in the monitored installation

failure of relay supply

internal failure of relay

Optical scale display by 5 LEDs of the fault in % of  $I_{\Delta n}$

DUVR  
Delayed undervoltage release

When associated with MCCB, the add-on block provides an earth fault protection and protects against electrical shocks by direct or indirect contact.

The add-on blocks are protected against nuisance tripping caused by transient voltages. It's able to detect sinusoidal alternating currents and residual pulsating direct currents (A type ). It also avoids miss tripping (HI type - High Immunity).

### Characteristics

**Reset button :**  
Signals add-on block tripping and must be reset before switching on the installation.

**Test button for RCD function :**  
Checks the electrical operating of the MCCB / Add-on block association.

**Mechanical test button :**  
Checks the mechanical operating of the MCCB / Add-on block association.

**LED signaling residual current level in the installation:**  
25% (orange) and 50% (red)  $I_{\Delta n}$ ; green light to signal correct operating.

**Remote tripping and advanced warning (50%  $I_{\Delta n}$ ) signaling thanks to these contacts:**

### Earth leakage current ( $I_{\Delta n}$ ) and delay ( $\Delta t$ ) setting

### Add-on block operating

A ( $I_{\Delta n}$ )

	0.03	0.1	0.3	1	3	6

0.3	no	OK	OK	OK	OK	OK
0.5	no	OK	OK	OK	OK	OK
1	no	OK	OK	OK	OK	OK

## Add-on block mounting

Exclusive drawer assembly system allows quick mounting and makes MCCB and add-on block association a complete monoblock unit.

Reinforced insulation connection (class II)

System avoids the omission of terminal tightening

### Tripping curve

MCCB x250

Earth fault loop impedance ( $Z_s$ ) can be calculated from the formula  
 $Z_s \leq 230 \times 0.95$

Where  $I_a = I_n$  of MCCB x mag setting  $\times 1.2$

### Thermal constraint curve at 400V (Let-through energy)

MCCB x250

### Tripping curve

MCCB h250 TM

### Current limiting curve at 400V (Let-through peak current)

MCCB x250
