

Technical data

Supply Voltage: 220-240 V~, 50 Hz

Bulb Type: 78537--9W LED (COB), 4000K
78538--15W LED (COB), 4000K
78540--30W LED (COB), 4000K

This product contains a light source of energy efficiency class **G**.
This product contains a light source of energy efficiency class **F**.
This product contains a light source of energy efficiency class **E**.

99552--9W LED (COB), 3000K
99553--15W LED (COB), 3000K
99554--30W LED (COB), 3000K

This product contains a light source of energy efficiency class **F**.
This product contains a light source of energy efficiency class **F**.
This product contains a light source of energy efficiency class **E**.

99555--36W LED (COB), 3000K
99556--36W LED (COB), 4000K

This product contains a light source of energy efficiency class **D**.
This product contains a light source of energy efficiency class **D**.

Non-replaceable light source

Replaceable control gear by a professional

Conformity with all relevant UKCA Directive requirements.

Conformity with all relevant EC Directive requirements.

The power supply is Double Insulated and does not require connection to an Earth circuit.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or local store for recycling advice.

This product is not suitable for dimming.

Care and Safety

We recommend cleaning with a soft dry cloth. Do not use solvents or abrasive cleaners as these could damage the finish. For your safety, always switch off the power supply before cleaning.

Always disconnect the product from mains at least 10 minutes allowing to cool down before any maintenance or adjustment.

This light source is protected by a shade. This part must be replaced immediately should the shade become cracked or damaged. This fitting must not be used without the shade in place.

Instruction manual

Axial Recessed

Thank you for purchasing this light fitting. Please read the instructions carefully before use to ensure safe and satisfactory operation of this product. Please retain these instructions for future reference.

Warning

 This power supply is Double Insulated and does not require connection to an Earth circuit.

Please read these instructions carefully before commencing any work.

This unit must be fitted by a competent and qualified electrician.

Check the pack and make sure you have all the parts listed.

Install in accordance with the IEE Wiring regulations and current Building Regulations.

To prevent electrocution switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge. If you are in any doubt, please consult a qualified electrician.

This light fitting should be connected to a fused circuit.

If replacing an existing fitting, make a careful note of the connections.

This system contains non-replaceable parts and cannot be serviced. If damage occurs the part should be scrapped.

The external flexible cable or cord of this luminaire cannot be replaced; if the cord is damaged, the luminaire must be destroyed.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your local authority or retailer for recycling advice.

Layout

Plan the desired layout of these fittings carefully, ensuring the cables will reach the distances between the LED Driver and each light fitting.

Ensure that there is adequate ventilation for the LED Driver.

Avoid locating any cables in positions that would cause a hazard. Position cables and outdoor rated junction boxes (not supplied) away from areas where they may be at risk from being cut, trapped or damaged.

The mains supply cable must have a minimum cross sectional area of 1.0mm²

Cables must be protected using suitable conduit or plastic trunking.

The minimum ceiling void depth is 90mm. when more than one downlight is installed, the minimum distance between units is 500mm. the unit must be located a minimum distance of 50mm from a joist.

 Spotlights give a concentrated beam of light and must not be positioned any closer than 0.5M (50cm) to the illuminated surface.

 Ensure free movement of air around the fitting by removing any roof void insulation from at least 150mm around the hole. Under no circumstances must these fittings be covered with insulating matting or similar material.

Installation

Existing fittings must be completely removed before installation of a new product. Before removing the existing fitting, carefully note the position of each set of wires.

Note that the switch is turned off before installation.

Ensure that the screws and cable entry points are sealed to maintain the IP rating of the product.

- Cut a mounting hole in the ceiling taking care not to foul any pipes, mains cables or joists beneath the surface.
78537/99552----- Cut hole: $\varnothing 77\text{mm}$ / Minimum cavity depth: 75mm
78538/99553----- Cut hole: $\varnothing 90\text{mm}$ / Minimum cavity depth: 85mm
78540/99554----- Cut hole: $\varnothing 125\text{mm}$ / Minimum cavity depth: 120mm
99555/99556----- Cut hole: $\varnothing 145\text{mm}$ / Minimum cavity depth: 135mm
- It is always recommended to cut the hole slightly smaller than the size specified, and then file the hole until the recessed unit fits snugly.
- Pull the mains wire through the hole and open the cover of connect box to wire as detailed wiring.
- Push the spring clips upwards and fit into the ceiling hole, then push the unit up until firmly in position, ensuring that no cables are trapped. Ensure that the product is sitting properly in the hole.
- Adjust the head angle for your preferred.
- Switch on. Your light is now ready for use.

Wiring

Having correctly identified the wiring from your light fitting, pull the wire through the hole and connect to the connector block inside the LED driver in the following way:

This unit is double insulated and must not be earthed. If there are any incoming earth cables, they must be joined together and well insulated with good quality insulation tape. This is to ensure earth continuity throughout your property.

- Check that...
- You have correctly identified the wires.
 - The connections are tight.
 - No loose strands have been left out of the connection block.
