

SURFACE WIRING PVC 6181Y

A 300/500 Volt, single core PVC insulated & sheathed (double insulated) surface wiring cable. Suitable for use in domestic and light industrial applications where the risk of any mechanical impact is low. The cable can be clipped directly to a surface, used on tray, embedded in plaster or used in free air.

CONSTRUCTION

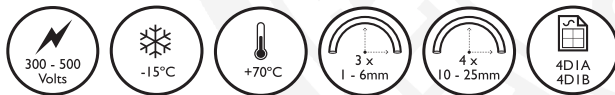

Single core class 2 plain copper conductor, with 19 strand formation enabling greater flexibility , outer sheath colour consistent with inner , for more clear identification.

TECHNICAL DATA

BS 6004

Nominal Voltage	300/500V
Test Voltage	3000V
Operating Temperature	-15°C to +70°C
Bending Radius	1.0mm ² - 6.0mm ² 3 times O/D 10mm ² - 25mm ² 4 times O/D
Flame Propagation	BS EN 60332-1-2
Current Rating Table	4D1A 4D1B

Note - Minimum installation temperature 5°C
