## Returns & Faulty Items

- If any problem is encountered during or after installation, please call the All LED technical department to get the problem resolved as soon as possible.
- Please do not just return the item to the outlet you purchased it from, as you are only entitled to a replacement or refund after the unit has undergone testing and the unit has been confirmed as having a manufacturing defect/fault. Your statutory rights are not affected.
- The manufacturer will not be deemed liable or held responsible for any damages caused by faults or manufacturing defects that may be present in any of its products or the misuse or incorrect installation of this device. Please refer to our troubleshooting guide for further information.
- All goods are supplied under the terms and conditions of All LED LTD, a copy of which may be obtained upon written request.

1

Quick Install Guide

To be able to use a remote with your Smart Home Hub and intelligent lighting devices follow (Option 1 and Option 2). If you would like to use your remote directly with your intelligent lighting control devices without a Hub, follow instructions (Option 2).
Remove protective film on battery before first use.

Option 1: Connecting Your Remote to a Smart Home Hub e.g. Alexa Echo

LED Indicator

Step 1: From your smart home hub interface, choose to add a device or accessory and enter pairing mode as instructed below.

Step 2: Press and hold down All On button until LED indicator turns on.

Step 3: Immediately short press the All Off button. The LED indicator will flash. After 20 seconds the remote will time out. LED indicator will then blink x3 quickly for successful pairing.
Note: If unsuccessful, factory reset (as below) and try again.

Option 2) Connecting your remote to Intelligent lighting control devices.

LED Indicator

Step 1: Set receiving device to Find and Bind mode. Lights will flash indicating Find and Bind mode active: Duration 3 minutes.

Step 2: Bring the remote within 10 cm of the intelligent lighting device. 3 minutes until timeout.

Step 3: Short press the ON button of group 1, 2, 3 or 4 to choose a group that you would like to pair the device to.
CARE: Select Zone First

Step 4: Press and hold down All ON button until LED indicator turns on.

Step 5: Immediately short press group 1 ON button to start pairing the remote. The LED indicator will flash fast for 3 seconds to start find and bind pairing and then flash x6 slowly to indicate successful pairing to the device.
Note: If unsuccessful, factory reset (as below) and try again.

Factory Reset Remote

Step 1: Press and hold down the ALL ON button until LED indicator turns on.

Step 2: Immediately short press the same button x5 continuously, LED indicator will flash x3 quickly to indicate successful reset.

LED Indicator

Note: All configuration parameters will be reset after the remote is reset or removed from the network.
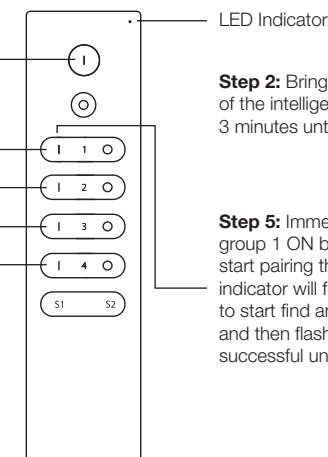

Remove Paired Devices

Removing An Intelligent Lighting Control Device From Your Remote

Step 1: Set receiving device to Find and Bind mode.
Lights will flash indicating Find and Bind mode active:
Duration 3 minutes.

LED Indicator

Step 2: Bring the remote within 10 cm of the intelligent lighting device. 3 minutes until timeout.

Step 3: Short press the ON button of group 1, 2, 3 or 4 to choose a group that you would like to pair the device to.
CARE: Select Zone First

Step 5: Immediately short press group 1 ON button **twice** to start pairing the remote. The LED indicator will flash fast for 3 seconds to start find and unbind pairing and then flash x6 slowly to indicate successful unpairing to the device.

Step 4: Press and hold down All ON button until LED indicator turns on.

Scenes

How To Save Scenes

Step 1: Make sure that lighting devices have already been paired to any of the 4 groups that you would like to save scenes for.

LED Indicator

Step 2: Press and hold the ON or OFF button of the desired group to adjust the brightness for each individual group.

Step 3: Press and hold down a scene button (e.g. S1) until LED indicator flashes to confirm the brightness for this group has been saved.
CARE: Select Zone First

Step 4: Repeat Step 3 if you want to save another scene to (S2).

How to Recall Saved Scenes

Step 1: Short press either the S1 or S2 buttons to recall a saved scene for each individual group.
