# TYPE A RCBO

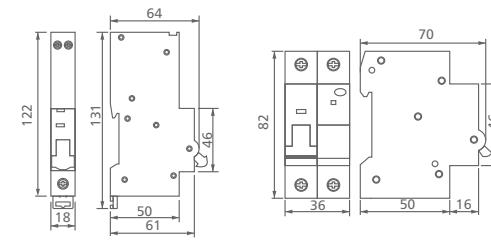

## Construction and Feature

- Type -A: Protects against AC and pulsating DC.
- Provides protection against earth fault/leakage current, short-circuit, overload, and provides point of isolation.
- Provides complementary protection against direct contact .
- Protects electric equipment against insulation failure.
- L pole and N pole both have overload protection on 2 pole version.
- 10KA breaking capacity.

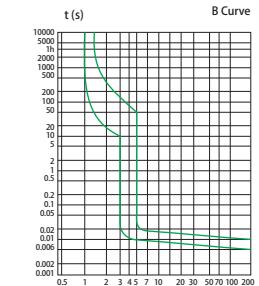

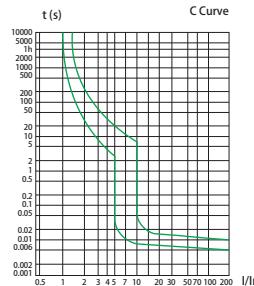

## Technical Data

- Rated current( $I_{n}$ ): 6A,10A,16A,20A,25A,32A,40A
- Rated voltage( $U_{n}$ ) 230V AC
- Breaking capacity ( $I_{cn}$ ) 10kA
- Rated residual current: 30mA
- Tripping characteristics: B,C
- Electrical endurance: 4000 cycles
- Mechanical endurance: 10000 cycles
- Installation:On symmetrical DIN rail 35mm
- Handle lock:ON/OFF Position
- Complies with BS EN 61009-1

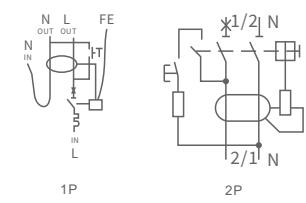

## Product Dimension

## Tripping characteristics

## Wiring Diagram

## Installation

- The external magnetic field of the place where the RCBO is installed shall not exceed 5 times of the geomagnetic field in any direction;
- The installation position shall be vertical and the inclination in each direction shall not exceed 10.
- Class of pollution: 2
- Installation category: II

## Connection capacity

- Flexible conductor 10mm<sup>2</sup>
- Rigid conductor 16mm<sup>2</sup>
