Design 10 is our board for all applications.

A board for all applications

Our Design 10 is our functional board designed for all applications making it an exceptional option for any home.

Easier Installation

Ample cable space is provided as standard. Our reduced height RCBO (up to 32A) is similar in height to an MCB, ensuring an even easier installation where lack of cabling space can be a challenge.

Flush or Surface

Design 10 Consumer units are available in flush and surface mounted variants, to suit a wider range of installations.

Installers in mind

Front cover screws can often be lost or misplaced on site during installation. Our fasteners are retained in place to ensure they won't be lost during installations.

The Full Package

Our Design Range has been launched with a large portfolio of accessories. Protector plates for cable entries, a cable clamp to secure meter tails & a stand off brackets all allow for an installation method that suits you.
